

Ellingham C of E Primary School Year 2 Assessment Expectations Mathematics: Fractions		
End of Term 1	End of Term 2	End of Term 3
Fractions		
I can find and name a half as two quarters in a range of shapes, measures and quantities.	I can find, name and write fractions: half, third, quarter, two quarters, three quarters of a length, shape, object,	I can recognise the equivalence 2 quarters = 1 half in a range of contexts.
I am beginning to understand fractions as numbers and I can count in steps of halves and quarters.	I recognise that two quarters = one half.	I can write simple fractions e.g. a quarter of 12 = 3.
	I can write simple fractions, e.g. half of six = three.	I can count in fractions up to 10 and start to use equivalence on the number line. E.g. 1 half = 2 quarters.
	I can count in steps of halves and quarters beyond 1.	
Problem Solving		
With practical materials, I can solve simple problems involving fractions of numbers, shapes, money and measures.	I can solve simple problems involving: numbers, shapes, measures, using fraction notation.	I can solve problems and give explanations for my reasoning.
