Science Progression Map: Year A

Year	Autumn Term	Spring Term	Summer Term	
	Seasonal Changes: Runs throughout the year through Forest School and outdoor working activities.			
EYFS	Miraculously Made: Human biology; healthy eating; sleep; personal hygiene; looking after our teeth.	People, Places and the Past: Medicines and poisons; building; forces; inventions; electricity.	Wet and Wild: Oceans, rivers, ponds; floating and sinking.	
1 and 2	**Seasonal Changes **Observe changes across the 4 seasons. **Observe and describe weather associated with the seasons and how day length varies. **Plants: Identification **Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees. **Identify and describe the basic structure of a variety of common flowering plants, including trees.	Working Scientifically: Practical Science *Plan investigations: ask simple scientific questions; suggest different ways of answering questions. *Conduct investigations: examine and observe things closely, including using simple equipment; carry out simple tests; take measurements; observe changes over time. *Record evidence: gather data; record data and evidence in a variety of ways. *Report findings: talk about findings and describe how findings were discovered; communicate findings in a variety of ways; begin to use simple scientific language. *Make predictions and draw conclusions: compare objects and living things and describe similarities, differences and patterns; use observations, ideas and findings to suggest answers to questions.	Animals, Including Humans: Animals and Their Structure *Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals. *Identify and name a variety of common animals that are carnivores, herbivores and omnivores. *Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets). *Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. Living Things and Their Habitats *Explore and compare the differences between things that are living, dead, and things that have never been alive. *Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other. *Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.	

3 and 4	*Recognise that they need light in order to see things and that dark is the absence of light. *Notice that light is reflected from surfaces. *Recognise that light from the sun can be dangerous and that there are ways to protect their eyes. *Recognise that shadows are formed when the light from a light source is blocked by an opaque object. *Find patterns in the way that the size of shadows changes. States of Matter *Compare and group materials together, according to whether they are solids, liquids or gases. *Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C). *Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.	*Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties. *Describe in simple terms how fossils are formed when things that have lived are trapped within rock *Recognise that soils are made from rocks and organic matter. Animals, Including Humans: Structure and Nutrition *Identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat. *Identify that humans and some other animals have skeletons and muscles for support, protection and movement.	Animals, Including Humans: Digestion and Teeth *Describe the simple functions of the basic parts of the digestive system in humans. *Identify the different types of teeth in humans and their simple functions. Animals, Including Humans: Food Chains *Construct and interpret a variety of food chains, identifying producers, predators and prey.
5 and 6	Properties and Changes of Materials *Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets. *Know that some materials will dissolve in liquid to form a solution, and describe how to	Forces *Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object. *Identify the effects of air resistance, water resistance and friction acting between moving surfaces. *Recognise that some mechanisms including levers,	Animals, Including Humans: Circulatory System; Transport of Water and Nutrients *Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood. *Describe the ways in which nutrients and
	recover a substance from a solution. *Use knowledge of solids, liquids and gases to decide how mixtures might be separated,	pulleys and gears allow a smaller force to have a greater effect.	water are transported within animals, including humans

including through filtering, sieving and evaporating.

*Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic.

*Demonstrate that dissolving, mixing and changes of state are reversible changes.
*Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.

Light

*Recognise that light appears to travel in straight lines.

*Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye.

*Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.

*Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.

Working Scientifically: The Appliance of Science

*Plan investigations: ask relevant questions and plan appropriate scientific enquiries to answer them; set up enquiries and tests; recognise and control variables; recognise and use secondary sources.

*Conduct investigations: decide which observations/measurements to take, how long to

observations/measurements to take, how long to take them for and when to repeat them; select and use a variety of scientific equipment; take accurate and precise measurements.

*Record evidence: decide how to gather and record

evidence; record, group and display data/results using tables, keys, diagrams, graphs and charts. *Report findings: use relevant scientific language to report findings in written and oral explanations, displays and presentations.

*Make predictions and draw conclusions: make informed predictions; use results to identify when further tests/observations are needed or to make new predictions; identify natural patterns; draw conclusions and explain how evidence supports them; explain causal relationships in data/results; identify and explain how evidence supports/ refutes predictions; suggest what degree of trust should be given to results.

Animals, Including Humans: Lifestyle Choices

*Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function.

Science Progression Map: Year B

Class	Autumn Term	Spring Term	Summer Term	
	Seasonal Changes: Runs throughout the year through Forest School and outdoor working activities.			
EYFS	Kingdoms and Communities: Building; forces; materials and their properties.	Wonderful World: Earth and space; electricity; light; seasons; weather.	Forest Fun: Plant biology; seeds and growth; habitats and minibeasts.	
1 and 2	Plants: Structure and Growth *Identify and name a variety of common wild and garden plants. *Identify and describe the basic structure of a variety of common flowering plants. *Observe and describe how seeds and bulbs grow into mature plants. *Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy. Living Things and Their Habitats: *Microhabitats *Identify and name a variety of plants and animals in their habitats, including microhabitats.	Everyday Materials/Uses of Everyday Materials *Distinguish between an object and the material from which it is made *Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock. *Describe the simple physical properties of a variety of everyday materials. *Compare and group together a variety of everyday materials on the basis of their simple physical properties. *Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses. *Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.	Animals, Including Humans: Living and Growing *Notice that animals, including humans, have offspring which grow into adults. *Find out about and describe the basic needs of animals, including humans, for survival (water, food and air). *Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene. Animals, Including Humans: Animals and Their Structure *Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.	
3 and 4	*Identify how sounds are made, associating some of them with something vibrating. *Recognise that vibrations from sounds travel through a medium to the ear. *Find patterns between the pitch of a sound and features of the object that produced it. *Find patterns between the volume of a sound and the strength of the vibrations that produced it.	*Compare how things move on different surfaces. *Notice that some forces need contact between 2 objects, but magnetic forces can act at a distance. *Observe how magnets attract or repel each other and attract some materials and not others. *Compare and group together a variety of	*Plants *Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers. *Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. *Investigate the way in which water is transported within plants.	

	*Recognise that sounds get fainter as the distance from the sound source increases. Electricity *Identify common appliances that run on electricity. *Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers. *Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery. *Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit. *Recognise some common conductors and insulators, and associate metals with being good conductors.	everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials. *Describe magnets as having 2 poles. *Predict whether 2 magnets will attract or repel each other, depending on which poles are facing. Living Things and Their Habitats: Changing Environments *Recognise that environments can change and that this can sometimes pose dangers to living things.	*Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal. Living Things and Their Habitats: Classifying Living Things *Recognise that living things can be grouped in a variety of ways. *Explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment.
5 and 6	Earth and Space *Describe the movement of the Earth and other planets relative to the Sun in the solar system. *Describe the movement of the moon relative to the Earth. *Describe the Sun, Earth and Moon as approximately spherical bodies. *Use the idea of the Earth's rotation to explain day and night and the apparent movement of the Sun across the sky. Evolution and Inheritance *Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.	**Resociate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit. **Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches. **Use recognised symbols when representing a simple circuit in a diagram. Living Things and Their Habitats: **Classifying Living Things** **Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants	Animals, Including Humans: Human Changes *Describe the changes as humans develop to old age. Living Things and Their Habitats: Life Cycles and Reproduction *Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird. *Describe the life process of reproduction in some plants and animals.

*Recognise that living things produce	and animals.	
offspring of the same kind, but normally	*Give reasons for classifying plants and	
offspring vary and are not identical to their	animals based on specific characteristics.	
parents.		
*Identify how animals and plants are adapted		
to suit their environment in different ways		
and that adaptation may lead to evolution.
